

PAU SANSA

Backend Developer

About Me

I am a backend programmer with experience in Spring Java, as well as in the development of microservices and reactive programming. I am passionate about the world of programming and enjoy participating in events such as fairs and hackathons. I am proud to have reached the final stage in various hackathons organized by renowned companies such as Vueling, T-System, Adidas, among others.

Experience

Entertainment API

Freelance 10 2023

My 'portfolio' API, where I will implement some of my backend skills with Java that I have been learning throughout my career as a developer.

Learned Skills: Reactive MongoDB

JUMP2DIGITAL

Freelance 10 2023

My solution to the JUMP2DIGITAL Hackathon. The challenge is to create an API for managing skins in a video game.

ITAChallenge API

It Academy 05 -08 2023

Reactive Java Spring project with microservices, we work with the SCRUM agile methodology.

Learned Skills: Docker, TestContainers, Reactive Redis Implementation, Consul.

DiceGame

It Academy 05 2023

Java Backend Bootcamp final project. It is a dice rolling gambling game.

Learned Skills: Spring Security, JWT, Thymeleaf, Bootstrap.

Education

01 - 05 2023

It Academy - Barcelona Activa

Java Backend Bootcamp

I gained experience in Spring Boot, creating APIs, microservices, managing MySQL and MongoDB databases, and testing techniques with JUnit and Mockito. I also strengthened my use of GitHub as an integral part of my daily workflow.

09 - 11 2022

Education First

EF Student Travel (C1)

- I resided in Dublin for two months.
- English academy.
